

# Download 3rd Grade Project Invent A New Planet

Summer Programs 2019. Joaquin Bustoz Math-Science Honors. The Joaquin Bustoz Math-Science Honors Program is intended for mature and motivated students who are interested in academic careers requiring mathematics, science, or engineering-based coursework and who are typically underrepresented in those fields of study. A math art project is a great way to encourage kids who love numbers to get creative and artistic kids to think about how mathematics and art work together. This rotational symmetry art project is just the ticket. As you will see the results of experimenting with rotational symmetry combines grooviness and exactness (such a good combo, wouldn't you say? If there's one thing parents envy about their kids, it's their uninhibited imaginations. Picture books are the perfect way to celebrate children's innate ability to imagine fantastic machines, invent new forms of travel and believe anything is possible. All of these books to inspire young inventors and engineers are also great for STEM and STEAM learning and for teaching growth mindset.
