

Download Peripheral Nervous System Modern Biology Study Guide

In this lesson we'll take a look at the structure and function of the nervous system of the bony fish. Bony fish, as opposed to cartilaginous fish, are within the Class Osteichthyes. Cyberfriends: The help you're looking for is probably here. This website collects no information. If you e-mail me, neither your e-mail address nor any other information will ever be passed on to any third party, unless required by law. Nervous System Essentials. If you stick the tip of your finger with a thumbtack, your body will tell you immediately: 'Hey! Stop that!' Pain is a fundamental evolutionary feature, something we ... Neuroendocrinology is the branch of biology (specifically of physiology) which studies the interaction between the nervous system and the endocrine system, that is how the brain regulates the hormonal activity in the body. The nervous and endocrine systems often act together in a process called neuroendocrine integration, to regulate the physiological processes of the human body.
